My name is Adis Skender and I am 25 years old. I have successfully graduated at Polytechnic Faculty in Zenica and earned bachelor's degree in Software engineering. I consider myself exceptionally enthusiastic and passionate about learning new technologies and expanding my knowledge especially in terms of Web development and Frontend. In terms of programming languages, I have an average experience in C#, specifically .NET Core for the backend which I used to create APIs to establish connection between backend and frontend, as well as storing data inside of the database. On the frontend side I have used HTML, CSS, JavaScript as well as React library for building various projects and all of the completed ones can be found on my GitHub account. I had opportunity to work on plenty E-commerce projects as an Intern using Shopware 6 platform and JTL Wawi, highlighting Homepages, product pages, various categories for Web Shops, etc. As for managing database I have previous experience working with SQL Server and I am open for expanding my knowledge further in this realm.

EXPERIENCE

APRIL 2021 – MAY 2021

INTERNSHIP, SOFTRAY SOLUTIONS

Studied and worked with lots of technologies such as C#, .NET Core, Angular framework and SQL Server to create functional and reliable "To do" app.
